2026

EMEA VERSION

TOUGH DOESN'T QUIT

When you invent categories, your work is never finished. We're riders, relentlessly chasing the next ride. It's race-inspired performance that propelled our people to podiums at DAKAR and the Baja 1000, or a crew of relentless explorers who want to break free from the everyday and get deep into the backcountry. Tough doesn't stop when the light fades, tough doesn't settle for second place, and tough doesn't quit.

The bolt-on, tandem mid-roller wheel provides a smoother ride by absorbing shocks.
- 5 BEARING HOUSING**

Outer seals and stainless steel sleeves allow stronger bearing durability and greater reliability.

PS-4 EXTREME SYNTHETIC 0W-50

- Our best extreme high and low temp formula, excellent for high temperatures and racing, even at temps of 54°C, plus easier cold starting even below -42°C
- Expect the best in wear protection thanks to premium PAO and ester base stocks combined with a balance of moly and ZDDP additives
- Polaris exclusive clean engine additive system reduces deposits and carbon build-up for peak performance and power

THE BEST PROTECTION, MAXIMUM PERFORMANCE

- Powersports grade full synthetics provide long lasting engine protection
- At least 40% improved wear protection compared to all aftermarket oils tested (see engine wear test chart)
- Polaris exclusive clean additive system
- At least 50% less deposits than all aftermarket oils tested (see deposit test chart)
- Cleaner engine with less deposits means consistent maximum power and performance

WIDEST VISCOSITY FOR ULTIMATE PROTECTION

ENGINE WEAR TEST

LOWER NUMBER = LESS ENGINE COMPONENT WEAR
LESS WEAR ON PARTS MEANS LONGER ENGINE LIFE

ASTM D4172. In 3rd party testing against 9 competitive products Polaris had 40% or better wear protection compared to all of the tested products. Numbers represent mm of wear scarring measured. Test measures wear at contact points, wear scar is measured for its length and width (in units of mm). Lower wear numbers mean better wear protection and friction reduction.

DEPOSIT TEST

LOWER DEPOSITS = MAXIMUM POWER

ASTM D6335. In 3rd party testing against 9 competitive products Polaris PS-4 had less than half the deposits compared to the next closest product. No other tested products met Polaris Engineering standards for deposit cleanliness. Test measures mass of deposits in mg in high temp, high stress test cycles. Higher deposits will impact engine power and performance.

THE AMERICAN POWERSPORTS CO.

The Polaris story begins with a relentless drive to explore what's outside, to test our potential.

It all began here in America—over 70 years ago—in a small factory in Roseau, Minnesota. There, our founders forged a company built on American values, grit and ingenuity.

That factory is not so small anymore and still operates to this day, and in 2014, a new era began as our European factory assembled its first vehicles in Opole, Poland. This expansion channelled our American legacy to the heart of Europe. Our factories build the best powersports machines that America has to offer, working alongside our design, development, and testing departments as we strive to create vehicles that move you.

Today, we continue to design, engineer, and test our industry-leading vehicles across the world on dirt, sand, snow and soil with owners like you in mind.
