SCUBAPRO

DEEP DOWN
YOU WANT THE BEST

DIVE IN.

Welcome to SCUBAPRO's 2020 guide to the latest and greatest in dive equipment innovation. On each page you'll find highlights of this year's new gear offerings, featuring the most advanced technology in design and engineering. Immerse yourself in the best diving has to offer. Don't end your exploration here. Visit scubapro.com for more information on our full line of diving and snorkelling products, guaranteed to make your next dive an experience to remember.

LIVE THE LEGEND.

Founded in 1963 by two of scuba diving's pioneers, Gustav Dalla Valle and Dick Bonin, SCUBAPRO is the world's premier manufacturer of scuba diving equipment. For over 50 years SCUBAPRO has led the industry in dive equipment innovation, and in doing so has changed the face of diving.

THE MOST RESPECTED NAME IN DIVING.

You'll find SCUBAPRO gear on dive boats, at dive resorts, in diving locales the world over. Be it new divers or seasoned veterans, SCUBAPRO is the name divers trust, which is why divers own and use SCUBAPRO equipment with confidence and pride. When you dive with SCUBAPRO, you dive with the best.

ALWAYS FIRST, ALWAYS FINEST.

From the very beginning, SCUBAPRO has been the spearhead in the development of quality equipment that makes diving safer and more fun. SCUBAPRO engineers are dedicated to groundbreaking research and development, always first to the market with the new and the exciting.

A full-page background image showing a diver in a black wetsuit and scuba gear swimming horizontally in clear blue water. Above the diver is a massive, dense school of small, silvery fish, possibly sardines or anchovies, filling the upper half of the frame. The water is bright blue with some light rays visible. The diver is positioned in the lower center of the image, looking towards the camera.

"Across the globe, Mission Blue relies on SCUBAPRO equipment to carry out expeditions that shine light on the beauty – and fragility – of the ocean. Many thanks to the team at SCUBAPRO for keeping us safe and joining us in our mission to protect the blue heart of the planet."

– Dr. Sylvia Earle

ABOUT

DIVERS OUR OCEANS THE FUTURE OF OUR PLANET

For over 50 years, SCUBAPRO has been committed to the sport of diving and to the protection of the world's oceans that provide us all with so much enjoyment, exploration and adventure.

From our environmentally-responsible products, materials and manufacturing techniques to sponsoring the conservation efforts of numerous organisations and our Deep Elite Ambassadors work, no dive company does more to protect the environments we all love to explore.

TAKING ACTION. SUSTAINABLE PRODUCTS.

SCUBAPRO dive wear is the greenest – or rather bluest – in the industry. In 2012, SCUBAPRO was the first to introduce X-Foam neoprene in an ongoing effort to reduce pollutants and harmful emissions. In 2016, we were the first to introduce solvent-free glue on our Everflex suits. Today, all SCUBAPRO neoprene drysuits, wetsuits, shortys, hoods and gloves thicker than 1.5mm feature solvent-free glue to better protect divers and the environment.

RESPONSIBLE PACKAGING.

- All of our regulators, instruments and dive computers are already packaged in recycled carton boxes. We are continuously working on replacing all plastic boxes with fabric cases, similar to the MK25 EVO/S620 Ti packaging.
- Working diligently over the past few years, we have removed much of the plastic packaging from our line of accessories. We've already started to remove all plastic packaging from spare parts as well. Our goal is to reach 100% as soon as possible.
- Most of our masks come in a reusable box that can be used for transport and storage and is also handy for holding small items you need for diving [retractor, spare parts or Sea Drops].
- Plastic boot bags have been replaced with fabric bags, which can be reused for transport and storage. Similar packaging for dive socks, gloves and hoods will follow.
- Some of our fins are already available in reusable mesh bags. For all our fins we are already planning a new packaging made from recycled paper. Similar, "intelligent" packaging for further products will be implemented the near future.

SCUBAPRO products help new and experienced divers to discover and experience the amazing undersea world, and we invite everyone to join us in working to preserve it for future generations.

PROMOTING DIVING WHILE PROTECTING OUR OCEANS.

It is the SCUBAPRO way. Our mission, our passion. And SCUBAPRO leads by example.

BUILDING AN OCEAN ETHOS.

SCUBAPRO believes in working together to take on the biggest issues facing our oceans, while encouraging every diver to be conservation-minded. For over 50 years, we have partnered with organisations that share these ideals, including Mission Blue, Galapagos National Parks, Conservation International, WWF, Antinea Foundation, San Diego Oceans Foundation, REEF, and the National Marine Life Center, Sharkproject, SOS Seaturtles, Yaqu Pacha, Ozeankind, among others.

LIVING OUR VALUES.

SCUBAPRO is staffed by avid divers who recognise a personal responsibility to preserve and protect the very thing that our products allow divers to explore. Renowned marine biologist and preservationist Dr. Sylvia Earle sat on our board for many years, while SCUBAPRO's president is on the Advisory Board of the National Oceanic and Atmospheric Administration [NOAA] Marine Sanctuaries. SCUBAPRO employees are active volunteers, and our regional offices regularly lead beach cleanups and donation drives. And because we believe more divers lead to more ocean advocates, we contribute to causes that create new divers, from underprivileged children to veterans.

**12.7 MILLION TONS OF PLASTIC END UP IN OUR
OCEANS EVERY YEAR.**

IT'S TIME TO ACT!

SCUBAPRO
cares

BREATHE EASY.

SCUBAPRO STANDS FOR QUALITY.

You can dive with total confidence when you dive with a SCUBAPRO regulator system. Quality, reliability, and superb breathing performance – that's what SCUBAPRO engineers strive for, and that's what SCUBAPRO regulators are known for.

It's a stellar reputation well-earned from over five decades of cutting-edge engineering and industry-changing innovation that has changed the face of scuba. With a SCUBAPRO regulator you can focus on the underwater experience, not your gear. This is why divers depend on SCUBAPRO.

OVER A HALF-CENTURY OF ENGINEERING EXCELLENCE.

SCUBAPRO leads the dive-equipment industry in innovation, creating numerous products that have changed the face of scuba. Every decision that goes into our products – from design and manufacturing to engineering and packaging – is based on quality and performance, not price. Nowhere is this commitment more apparent than in our full line of high-performance regulator systems.

WE SPARE NO EXPENSE IN R&D.

SCUBAPRO invests heavily in product development. Our state-of-the-art R&D facility in Italy is fully equipped with the latest breathing machines and long-term cycle testing machines, as well as the most sophisticated data collection tools, all to ensure bulletproof reliability in our regulator systems. Our tests are comprehensive and intensive, far surpassing industry standards.

UNEQUALLED PERFORMANCE.

SCUBAPRO regulators not only perform well in our testing, but also perform incredibly well over time for divers around the world. Designs engineered by teams with years of experience and thousands of dives, are brought to life with high-end materials and tooling. The result is the ultimate in reliability. Our regulators look good on the outside, but the engineering excellence inside is what counts the most.

Every SCUBAPRO regulator carries a 24-month/100-dive service interval and, if purchased through an Authorised Dealer, is covered by a lifetime, worldwide warranty.

A NAME DIVERS TRUST.

The best endorsements for SCUBAPRO regulators come from the divers who use them. On dive boats and in diving circles the world over, SCUBAPRO regulators have a reputation for performance and dependability. Our popularity is highest among professional divers and instructors, who own SCUBAPRO products with pride. When you dive with SCUBAPRO, you're diving in good company.

INDUSTRY LEADERS IN REGULATOR INNOVATION

1ST

- Air-balanced flow-through piston regulator on the market.
- Second stage with an adjustable balanced valve.
- Alternate-inflator regulator integrating the BCD inflator with a second stage.
- Adjustable VIVA [Venturi Initiated Vacuum Assist].
- Patented Extended Thermal Insulating System [XTIS], which transforms the MK25 EVO – widely considered the most powerful first stage in diving – into diving's premier high-performance cold-water regulator.

AWARD-WINNING PERFORMANCE.

Along with these and other awards from the U.S. media, SCUBAPRO regulators have also earned numerous accolades in other global markets. These include many prestigious Tauchen Awards in Europe and consistent top honours in media reviews and product shootouts around the world.

SCUBAPRO regulator systems consistently outshine the competition in independent regulator tests, delivering reliable, low-effort airflow regardless of depth, tank pressure or breathing rate.

THE BENEFITS OF PISTON TECHNOLOGY.

The task of a first stage regulator is quite simple: reduce the high-pressure air flowing from the tank to a consistent intermediate pressure for delivery to the second stage. By far the best way to accomplish this necessary step-down process is with a piston-style first stage.

AIR-BALANCED PISTON.

Air-balanced piston first stages are the first choice of demanding sport divers and professionals. Here's why:

PERFORMANCE

No other first stage design can reach the high air delivery rate of a balanced piston first stage. Performance is totally unaffected by changing tank pressure or depth.

RELIABILITY

A much simpler mechanism using few moving parts so offers excellent reliability and requires very little maintenance.

RESPONSIVE

The use of lighter and more sensitive components results in an ultra-fast breathing response, instant delivery of air on demand and extra-high air flow, especially in the low tank pressure ranges.

VERSATILITY

A balanced piston first stage performs equally well in both warm and cold water environments.

CLASSIC DOWNSTREAM PISTON.

This time-proven piston design has been around for decades. It's a bona fide diving classic, and for good reason:

STRAIGHT-FORWARD MECHANISM

The simplest mechanism to control the pressure drop from a tank to feed the second stage.

A REAL WORKHORSE

While it does not compensate for minor pressure changes as air is consumed, like an air-balanced first stage does, its simple design requires little maintenance and delivers dependable airflow.

ECONOMICAL

A good choice for new divers looking for an air delivery system they can trust, that's easy to use, and that won't put too big a dent in their pocketbooks.

MK25 EVO

Year after year, in successive independent tests, SCUBAPRO's flagship high-performance first stage consistently ranks as the top-performing first stage on the market. With this air-balanced flow-through piston-style first stage mounted to an air cylinder, you are guaranteed superb inhalation sensitivity and instant delivery of air on demand, in all diving environments and all water temperatures.

PATENTED EXTENDED THERMAL INSULATING SYSTEM (XTIS)

Fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation. This radically increases breathing reliability when diving in extreme water temperatures.

OPPOSING HP PORTS

Allow the first stage to be positioned either up or down.

FIVE HIGH-FLOW LP PORTS

Mounted on a 360° swivel turret to maximise hose routing options.

MK21

About 20% smaller than the MK25 EVO but benefitting from the same core technology, the MK21 features a modern, cutting-edge design whose size and weight make it an excellent choice for travel divers. Its versatile port layout can also be very useful for technical diving.

AIR-BALANCED FLOW-THROUGH PISTON DESIGN

Provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.

EXTERNAL FINS

Unique thermal exchange design with external fins optimises freezing resistance.

OPTIONAL 5TH PORT CAP

Increases routing configurations with four angled low pressure ports plus a fifth centralised high-flow low pressure port, ideal for technical diving.

MK2 EVO

SCUBAPRO's classic MK2 EVO is a reliable workhorse, and it's the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions. It's a great entry-level reg for new divers, and also for veteran divers and travel divers who like to keep their diving simple and affordable.

PATENTED EXTENDED THERMAL INSULATING SYSTEM (XTIS)

Fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.

EASY TO MAINTAIN

Stainless steel removable orifice allows for easier maintenance while extending regulator life.

COLD-WATER CERTIFIED

Meets new EN250-2014 standards for cold-water breathing performance.

THE BENEFITS OF DIAPHRAGM TECHNOLOGY.

An air-balanced diaphragm first stage is a bit more complex, with more moving parts, than a piston first stage. However, its body is environmentally sealed to prevent water and pollutants from fouling the inner mechanism. Because of this, it tends to be favoured by divers who find themselves in waters containing lots of suspended particles, silt, or contaminating materials. All SCUBAPRO diaphragm first stages deliver reliable and consistent air delivery regardless of tank pressure.

MK19 EVO

new

THE ULTIMATE FIRST STAGE FOR COLD WATER OR CONTAMINATED DIVING CONDITIONS.

Combining two classic designs with the latest technology, the MK19 EVO takes the environmentally sealed system from the MK17 EVO and adopts a new dry ambient pressure chamber that enhances freezing resistance while ensuring consistent airflow in the coldest conditions. Then, from the MK25 EVO it takes the user-friendly swivel turret that maximises options for LP hose routing. With its superb cold-water performance and compact size, the MK19 EVO is ideal for professional and technical divers as well as recreational divers.

ENVIRONMENTALLY SEALED SYSTEM

Internal components are completely sealed off from the elements so neither water nor pollution can get inside the chrome-plated marine grade brass body to foul the mechanism.

ADVANCED DRY AMBIENT PRESSURE CHAMBER

Works to prevent freezing, provides better protection and improves performance, ensuring trouble-free operation no matter how cold or murky the water gets. Double spring system ensures long-term reliability.

USER-FRIENDLY 360° SWIVEL LP TURRET

Increases rigging versatility with five high-flow low-pressure ports that maximise hose routing options.

MK17 EVO

The air-balanced diaphragm MK17 EVO delivers constant and effortless airflow, and its internal system is completely sealed off from the elements, ensuring trouble-free operation no matter how cold or murky the water gets. This first stage is preferred by many cave and wreck divers who commonly find themselves in highly silted environments.

DRY AMBIENT PRESSURE CHAMBER

Increases freezing resistance, ensuring consistent airflow in the coldest conditions.

ENVIRONMENTALLY SEALED SYSTEM

Prevents water and pollutants from fouling the inner mechanism.

HIGHLY EFFICIENT INTERNAL DESIGN

Allows more airflow from its high-flow LP ports that are specially configured for better hose routing.

MK11

With a compact design to reduce size and weight, the MK11 is an ideal travel companion. It has the same basic structure as the MK17 EVO, without the dry chamber. It is a good choice for divers who want the benefits of a sealed system for more temperate waters.

AIR-BALANCED DIAPHRAGM DESIGN

Delivers constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.

MULTIPLE PORTS

Two high pressure ports, two high-flow LP ports and two standard LP ports maximise hose routing options.

EASY IP ADJUSTMENT

External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.

A-SERIES

Precision hand-crafted A-Series second stages are built to last. With its striking all-metal casing, screw-down casing cover and metal valve housing, the A700 is muscular in build as well as performance. Its air-balanced valve technology, stainless steel inlet tube and oversized exhaust valve deliver an ease of inhalation and exhalation that is unmatched.

A700

Designed for divers who want the best, the full-metal A700 offers excellent breathing performance. Teamed with a MK25 EVO or MK17 EVO, it provides unparalleled breathing performance in all water temperatures.

FULL METAL CASING

Enables you to take advantage of the high heat exchange rate, a huge plus for cold-water diving.

RUGGED CONSTRUCTION

Special Torx screw-down metal front cover and metal casing plus stainless steel valve housing withstand years of aggressive diving.

BETTER BREATHING

Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity.

MK25 EVO BT/A700 CARBON BLACK TECH

All of the features of the A700, plus a lightweight, virtually indestructible carbon fiber front cover and durable Black Tech coating for technical diving and more. This race-car-sleek system works as good as it looks.

LIGHTWEIGHT PERFORMANCE

Casing is full metal but the front cover is hand-made out of carbon fiber, which is both lightweight and virtually bullet-proof.

HIGH-TECH MATERIALS

Carbon fiber can resist substantial shocks without damage while reducing the overall weight of the casing.

PROTECTIVE COATING

Black Tech scratch-resistant coating on metal parts protects against the ravages of salt water and corrosion. This durable coating includes an inner layer of chemical Nickel [FDA approved] and a glossy DLC [Diamond Like Carbon] outer layer.

D-SERIES

The D-Series regulator, with its distinctive design, has been a favourite among avid SCUBAPRO regulator enthusiasts for more than three decades. This new generation draws from the iconic heritage of the original D-Series regulator while delivering 21st Century quality, reliability, performance and style to become one of the easiest-breathing and most comfortable regulators in diving.

D420

new

TIMELESS DESIGN, SUPERB BREATHING PERFORMANCE

The perfect blend of rich diving history and cutting-edge regulator technology, the D420 delivers top breathing performance with classic styling. It features a brand new balanced valve called the Progressive Flow Control Valve that delivers abundant airflow for the best breathing performance, with a natural smoothness not unlike what you might experience breathing on the surface. This technical jewel is a must-have breather for all divers and all dive scenarios.

DISTINCTIVE FIBERGLASS-REINFORCED NYLON CASING

Is ultra-durable and allows the LP hose to be connected on either the right or left side for maximum rigging flexibility.

INTERNAL WINGLETS

Direct airflow towards the exhaust valve, creating a dramatic improvement in exhalation effort.

SPECIALLY DESIGNED DIAPHRAGM

Is located in the lower section of the casing to take advantage of the pressure gradient in the upright position, making breathing even easier.

DIVE/PRE DIVE SYSTEM

DIVE/PRE-DIVE SYSTEM

Includes a switch on the top of the case with a thumb tab for adjusting the direction of airflow right out of the valve.

SUPER EFFICIENT PURGE

Based on a new concept that gives the D420 its unique face, it is easy to reach and depress, with or without gloves.

EFFICIENT PURGE

S-SERIES

S-Series air-balanced second stages are synonymous with SCUBAPRO quality, unbeatable engineering and unmatched breathing performance.

S620 Ti

The S620 Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. It delivers excellent performance, providing effortless airflow in a comfortable, lightweight package. In all water temperatures, all diving depths, and all dive conditions, this regulator is a winner.

UNBEATABLE ENGINEERING

A smaller and lighter version of SCUBAPRO's best-selling second stage.

UNBELIEVABLE PERFORMANCE

Improved work of breathing [37% lower effort than the S600].

UNRIVALED INNOVATION

Corrosion-free titanium inlet tube protects against the harsh effects of sea water.

FLOW-ENGINEERED EXHAUST TEE

New design does a great job of diverting bubbles while helping to substantially lower work of breathing.

FULLY ADJUSTABLE

An easy-grip inhalation effort control knob and VIVA switch let you modulate breathing resistance to suit diving conditions as well as your personal preference.

S600

SCUBAPRO's best-selling air-balanced second stage, the S600 is renowned for its powerful performance, user-friendliness and ease of breathing. It offers responsive user controls and an efficient purge. With its rugged reinforced technopolymer casing, stainless steel front face and ring, and stainless steel inlet tube, the time-proven S600 delivers top breathing performance every time.

MK25 EVO T/S620 X-TI

SCUBAPRO's top regulator technology is on display in this ultra-light, totally corrosion-resistant regulator system. It includes all of the features of the S620 Ti, plus teams its titanium inlet tube with a durable titanium faceplate. Add a MK25 EVO T first stage, machined from a solid block of corrosion-free titanium, and you have a high-performance regulator system promising years of trouble-free use.

G-SERIES

G-Series second stages are the most imitated air-balanced second stages of all time. Introduced in 1986 as the G250, it was the first regulator to offer an adjustable Venturi Initiated Vacuum Assist (VIVA). Today's modern version, the G260, is a great choice for both rec and tech diving.

G260

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold-water or technical diving. Teamed with the powerful MK25 EVO or MK17 EVO, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions.

METAL COMPONENTS

Inlet tube, orifice, inhalation control knob and hose connector equal excellent cold-water performance.

HIGH FLOW EXHAUST

Valve reduces exhalation effort for better overall breathing comfort.

VERSATILE DESIGN

Full user controls plus a left-right hose attachment option makes it a great choice for tech diving configurations.

MK25 EVO BT/G260 BT

Take all of the features of the G260 and add a Black Tech scratch-resistant coating on all metal parts, and you have a performance system that's protected against the ravages of salt water and corrosion. This durable coating includes an inner layer of chemical Nickel (FDA approved) and a glossy DLC (Diamond Like Carbon) outer layer.

C-SERIES

C370

SMALL IN SIZE — BIG IN PERFORMANCE

Breathe smoothly and silently, at all depths, and all tank pressures, with the air-balanced C370. Its compact size and light weight make it the ideal choice for dive travellers, female divers and smaller-sized divers. Pack it in your dive bag and get ready for some blue-water adventures – anywhere, anytime.

AIR-BALANCED

Effortless airflow at all depths and supply pressures with rock-solid reliability.

TRAVEL FRIENDLY

Lightweight, compact, easy to handle.

BUILT TO LAST

Rugged fiberglass-reinforced nylon casing can take abuse.

LARGE PURGE BUTTON

Easy to activate, even wearing thick gloves.

NEW EXHAUST TEE

Contributes to better work of breathing.

FULL USER CONTROLS

Allow you to regulate inhalation effort plus prevent freeflows, both at depth and on the surface.

R-SERIES

Built with classic downstream technology, R-Series 2nd stages are rugged, reliable and economical. They are versatile too. With their left or right hose routing capability, they are perfect choices for use on stage or pony bottles, or as octopus regulators. And when teamed with the time-honored MK2 EVO you get a regulator system with proven performance.

R195

The R195 is a design based on the heritage of the classic R190 second stage, reengineered with modern features and materials. Its simple and robust construction offers the utmost in reliability and makes the R195 the ideal second stage for new divers.

REVERSIBLE HOSE ATTACHMENT

A perfect choice for stage tanks and octopus regulators.

TRAVEL FRIENDLY

Lightweight, compact, easy to handle.

BUILT TO LAST

Rugged fiberglass-reinforced nylon casing can take abuse.

LARGE PURGE BUTTON

Easy to activate, even wearing thick gloves.

For Nitrox regulators please see: www.scubapro.com

R195

R195 Octopus

R095

NEOPRENE COVER 2ND STAGE

This handy neoprene cover protects your valuable 2nd stage from bumps and scratches. It attaches to the LP hose and wraps around the second stage casing.

AWESOME TECHNOLOGY. INCREDIBLY INTUITIVE.

The personal dive computer's ability to monitor depth and bottom time, track nitrogen loading and calculate decompression makes diving safer, easier, and a lot more fun. But not all dive computers are created equally. That's why divers choose SCUBAPRO.

UNIQUE, ADVANCED, AMAZING.

SCUBAPRO's UWATEC dive computers have set the standard for performance and inventiveness. SCUBAPRO's Swiss-based designers and engineers know what divers want in their computers, and they deliver, from the revolutionary Aladin Pro to the game-changing Galileo to the next-generation G2. 2019 the revolutionary mask-mounted, hands-free Galileo HUD, with its virtual floating heads-up display, delivers a dive computer experience unlike anything else in diving. When it comes to advanced technology, SCUBAPRO computers are designed to amaze.

A SCUBAPRO COMPUTER TO MEET EVERY DIVE CHALLENGE.

SCUBAPRO's expansive 2020 dive computer line includes solar powered computers, console computers and wrist-mount computers, as well as compact, wristwatch-style computers that do double-duty as stylish topside timepieces. All models are upgradeable, so you can keep up with the latest in software and technological advancements. Whether you're looking for a fully-loaded multi-gas, air-integrated computing powerhouse or an inexpensive backup, there's a SCUBAPRO dive computer ready to go diving with you.

YOUR BODY SPEAKS. SCUBAPRO LISTENS.

Human Factor Diving™ is SCUBAPRO's revolutionary approach to product development that combines Human Factors Engineering, biometrics and wearable technology to create cutting-edge devices that make diving safer and more fun. Human Factor Diving™ keeps you at the center of the experience – before, during, and after your dive. SCUBAPRO computers are designed to be incredibly intuitive, easy to use, and most importantly, they are able to provide detailed, on-the-spot personal data.

GALILEO HUD new

EXPERIENCE DIVING ON AN ENTIRELY NEW LEVEL.

The Galileo HUD is a revolutionary mask-mounted, hands-free dive computer that displays easily viewable, critical dive information right in front of you. Never again do you have to take your eyes off your surroundings to view your dive data.

EASY TO READ “FLOATING” DISPLAY

Changing the way divers dive.

Micro OLED screen mounts on a diving mask in close proximity to the human eye. Using precision near-eye optics, this “floating” display creates a screen image that allows you to keep your eyes on both your dive data and the underwater scenery at the same time.

HANDS-FREE DATA MONITORING

Constant, easy-to-view dive data right in front of you for more dive freedom.

Super-convenient for photographers and tech divers engaged in underwater activities requiring both hands. Also, since you don't have to raise an arm or reach for a console to check your dive data, it allows for a more streamlined profile moving through the water.

SINGLE-KNOB USER CONTROL

It couldn't be easier.

When it's time to change screens or make adjustments, an intuitive push-wheel allows you to access functions with one hand. To operate the push-wheel, simply rotate it to navigate up and down within a menu, or increase or decrease a user setting.

FLIP-UP HINGE

Total data access when you need it, out of the way when you don't.

Convenient Flip-Up feature enables you to tilt the display up and out of the way. When it's time to resume data monitoring, simply tilt the display back down into position and you're ready to track your dive.

NAVIGATION

FULL COLOUR SCREEN

OLED 96x64p display produces vibrant colours for maximum readability in any ambient light conditions.

INTUITIVE MENU STRUCTURE

Navigate the system easily with a simple push-wheel interface.

A CHOICE OF ALGORITHMS

Predictive Multi-Gas Bühlmann ZH-L16 ADT MB PMG, or ZH-L16 GF for technical diving.

SELECTABLE DIVE MODES

Scuba, Gauge, Freediving and CCR.

TRIMIX & NITROX COMPATIBLE

Along with advanced CCR functionality.

UP TO 8 SELECTABLE GASES

In Scuba mode and 2 set points for CCR diving.

UNDERWATER & SURFACE NAVIGATION

3D full-tilt digital compass plus a built-in GPS that lets you store 3 pre-programmed headings.

WIRELESS AIR INTEGRATION

Compatible with the SCUBAPRO smart transmitter for tank pressure monitoring.

RECHARGEABLE BATTERY

Provides up to 20 hours of dive time per charge.

BLUETOOTH & USB DATA DOWNLOADS

Compatible with Apple and Android devices using LogTRAK.

GALILEO

EASY TO READ, EASY TO USE, EASY TO LOVE.

From beginner to tech diver, from Scuba to Freediving, CCR to Sidemount, G2 computers are designed to go anywhere your passion for diving takes you.

FULL COLOUR DISPLAY

TFT [Thin-Film Transistor] dot matrix LCD screen [320x240p] produces vibrant colours for maximum readability.

USER FRIENDLY

Ultra-intuitive with a simple 3-button control system and loads of diver-friendly functions.

MENU LISTINGS

Customisable, so you can use as much or as little G2 technology as you need.

DISPLAY CONFIGURATIONS

Four styles – Light, Classic, Full and Graphical – you choose.

LIGHT

CLASSIC

FULL

GRAPHICAL

AIR INTEGRATION

Monitors tank pressure, provides true remaining bottom time (RBT), and allows air consumption to be factored into the decompression calculation.

RECHARGEABLE BATTERY

Provides up to 50 hours of dive time per charge.

EASY NAVIGATION

Excellent full-tilt digital compass includes compass rose and bearing memory.

new

SWISS DESIGN
+ ENGINEERING

LUNA

Loaded with features and very user-friendly, the Luna comes with a choice of display configurations, an intuitive menu system, 3 dive modes and a great electronic compass. It has everything you need in a single-gas wrist-mount dive computer to maximise your underwater experience.

WIRELESS GAS INTEGRATION

Provides tank pressure, true remaining bottom time (RBT), and allows air consumption to be factored into the decompression calculation.

PREDICTIVE MULTI-GAS & HEART RATE UPGRADES

Allows you to use up to 3 nitrox mixes as well as monitor your heart rate while diving [optional purchases].

logtrak
SCUBAPRO

G2 WRIST MOUNT

Curved ergonomic low-profile shape sits comfortably on the arm. Can also be used on a retractor.

WIRELESS AIR INTEGRATION

Eliminates a hose, plus provides support for up to nine transmitters when all features are activated.

LED & SMART+ TRANSMITTER

The latest LED version lets you know if your tank has gas without needing to activate the computer.

MULTIPLE DIVE MODES

Scuba, Freediving, Gauge, CCR, Trimix and Sidemount for total in-water versatility.

G2 COLOUR BEZELS

Now you can personalise your SCUBAPRO G2 wrist-mount dive computer with a dash of colour. These special bezels are available in yellow and turquoise. Note: Bezel installation must be done by SCUBAPRO Tech Services.

G2 CONSOLE

CELL PHONE-STYLE

Screen is familiar and very easy to read at depth.

QUICK-DISCONNECT

Air integration system enables you to separate computer from HP hose for easy post-dive data downloading, traveling, and safe storage.

ULTRA-DURABLE BOOT

Protects the casing against bumps and includes hose protection to safeguard the quick-disconnect fitting.

DIVE MODES

Scuba, Gauge and Trimix.

A-COMPUTER

EVERYTHING A RECREATIONAL DIVER WANTS, AND EVERYTHING A TECHNICAL DIVER NEEDS.

SCUBAPRO's A1 and A2 are wristwatch-style dive computers like no others. Offering just the right balance of topside features, underwater functions and ease of use, they will quickly become an integral part of not just your diving life, but your everyday life as well.

MODERN DESIGN

Both functional and stylish for topside time-keeping as well as underwater data tracking.

HIGH-RES MATRIX DISPLAY

With large numbers that are easy to read under water, even in adverse conditions.

INTUITIVE MENU

And 4 button controls make it easy to navigate through the system.

SPORT MODE

Provides sport-related functions like a swim stroke counter and stopwatch.

LIGHTWEIGHT DESIGN

Is so comfortable on the wrist you won't want to take it off.

MICROBUBBLE LEVELS

Let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

BLUETOOTH LE INTERFACE

Lets you download dives to any iOS or Android device or PC/Mac. Firmware can be user-updated by going to scubapro.com.

A2 new

Designed for advanced divers and technical divers as well as CCR divers and freedivers who appreciate the compactness and convenience of a wrist-style dive computer, but demand the kind of features and functions that enable them to excel in their sport.

SMART TECHNOLOGY

Wireless air-integration can handle multiple transmitters and provides true remaining bottom time (RBT) based on your workload from breathing.

HEART RATE MONITOR

Records heartbeat and skin temperature that can be factored into the decompression calculation along with workload [with SCUBAPRO HRM Belt only; sold separately].

DIGITAL TILT-COMPENSATED 3D COMPASS

Allows for easy surface and underwater navigation.

PMG ZH-L16 ADT MB ALGORITHM

Accommodates 8 gases (21-100% O₂) plus 2 in CCR mode.

MULTIPLE DIVE MODES

Scuba, Gauge, Freediving, Trimix, Sidemount and CCR.

ADVANCED SPORT MODE

Offers sport-related functions like a swim stroke counter, activity counter [pedometer] and stopwatch.

logtrak[®] SCUBAPRO 

A1 new

The A1 is a single-gas nitrox dive computer designed for new divers and casual recreational divers looking for a simple wrist-style computer that can be worn on the surface as well as under water.

ZH-L16 ALGORITHM

Accommodates single-gas Nitrox capability from 21% to 100% O₂.

3 DIVE MODES

Scuba, Gauge, and Freediving.

SPORT MODE

Provides sport-related functions like a swim stroke counter and stopwatch.

ALADIN

AFFORDABLE COMPUTERS LOADED WITH FEATURES.

Aladin Matrix computers deliver impressive computing power, eye-pleasing screens and intuitive navigation systems. Available in three models, while they share many functions, each comes with unique features that enable you to match the right model to your individual diving style.

SCREEN

Updated LCD segmented display on the top, with an eye-pleasing matrix display on the bottom.

INTERFACE

Bluetooth Low Energy. Also Android and iOS app compatible.

DEPTH-RATING

Up to 120m.

BATTERY

Good for 200 to 300 dives; user replaceable.

PLUS

Audible and visual alarms, dive planners and logbooks.

ALADIN SPORT & ALADIN H (MATRIX)

Featuring a metallic silver faceplate and easy-to-read display, the Aladin SPORT (Matrix) is targeted to divers who want multi-gas functions as well as to recreational divers who appreciate a dive computer with the kind of features that enable them to evolve in their sport. The computer screen features an easy-to-read LCD segmented display on the top and middle rows, plus an eye-pleasing matrix display on the bottom row where you'll also find an easy-to-use on-board digital compass.

MICROBUBBLE LEVELS

Let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

PREDICTIVE MULTI-GAS ZH-L16 ADT MB ALGORITHM

Accommodates three gases [21-100% O₂].

PDIS (PROFILE DEPENDENT INTERMEDIATE STOPS)

Calculates an intermediate stop based on N₂ loading, current and previous dives, and breathing mixes for safer diving.

DIGITAL COMPASS

Displayed on the matrix bottom row, allows for on-the-spot navigation, at depth and on the surface.

THREE DIVE MODES

Scuba, Freediving and Gauge.

ALADIN ONE (MATRIX)

The compact, single mode Aladin ONE Matrix is easy to use, easy to understand, and delivers reliable dive data for enjoyable recreational diving. The essence of simplicity, this is an ideal computer for new divers, and a great backup once you're ready to move up to more advanced dive computing. This new model is loaded with upgrades.

UPDATED ALGORITHM

16 tissue compartments ZH-L16 algorithm replaces the ZH-L8 algorithm.

MODERN INTERFACE

Bluetooth Low Energy interface replaces IrDA communication.

SIMPLE OPERATING SYSTEM

Single dive mode [Scuba], single gas design programs Nitrox mixes to 50%.

INSTRUMENTS & CONSOLES

DIGITAL 330M

Electronic data delivery system provides actual and maximum depth, ascent speed, dive time and temperature. Rated to 330m.

DEPTH GAUGE, WRIST MOUNT

Oil-filled Bourdon tube design in an impact-resistant nylon case.

3-GAUGE IN-LINE CONSOLES

Pressure and depth gauges with 35-degree-tilt FS-2 or FS-1.5 compass.

FS-1.5

FS-2

COMPASSES

FS-1.5 calibrated to the Northern hemisphere, or the FS-2 for both hemispheres.

2-GAUGE COMPACT CONSOLES

Sturdy, ergonomic and compact consoles for depth and pressure or pressure and compass.

NITROX PRESSURE GAUGE

Full metal 50mm compact gauge. CE certified for up to 230 bar.

PRESSURE GAUGES

Compact instruments reading 0-400 bar. Dual gauge displays imperial and metric units simultaneously.

CORE FEATURES

FOR SCUBAPRO DIVE COMPUTERS

Microbubble levels: A range of microbubble levels allow your body to either take up less nitrogen or off-gas more before returning to the surface. Both work towards reducing the amount of microbubbles present in the body at the end of the dive.

Predictive Multi-Gas (PMG): Lets you enjoy the full benefits of carrying high oxygen concentration mixes in addition to your main breathing gas. The computer calculates the decompression schedule for all possible gas combinations and adapts the calculation accordingly.

Continuous average depth reading: Available in gauge mode and can be reset by the user anytime.

Profile Dependent Intermediate Stops (PDIS): Calculates an intermediate stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives, and breathing mixes.

Enriched air (Nitrox): 21%-100%. The ppO₂ is adjustable between 1 and 1.6 bar.

Gauge mode: Turns off all warnings and alarms (except low battery alerts) and monitors depth, time, and temperature without decompression calculations.

Logbook: Records depth, temperature, and heart rate profiles with a 4-second sampling rate, which can be downloaded to a phone, handheld device or a PC/Mac.

Freediving mode: A collection of features developed for freedivers, including a faster sampling rate, manual start, specialised alarms and warnings, adjustable water density, and specific logbook. Available as a free upgrade for Galileo Sol and Galileo Luna on SCUBAPRO.com. (Not available on the G2 Console or Aladin H).

Altimeter: Measures altitude and alerts you when approaching an altitude incompatible with saturation status after a recent dive.

Bookmark: Allows you to highlight specific moments with a simple button press.

Active back light: With push-on and push-off function.

Replaceable battery: By user or dealer.

TAKE CONTROL.

The buoyancy compensator device (BCD) is the backbone of a scuba rig. A well-designed BCD holds the tank firmly in place, routes HP and LP hoses, and provides clipping-off points for accessories. It offers a high-security integrated weight ditch system and roomy cargo pockets. It also arms you with an efficient system of inflate and exhaust valves for maintaining neutral buoyancy and controlling ascents and descents. And it does all this while maintaining a streamlined profile and stability at depth. It's a lot to expect from a single piece of equipment, but SCUBAPRO BCDs are more than equal to the task.

DIVE-TESTED.

SCUBAPRO BCDs go far above and beyond in compliance standards, and they are built to last. SCUBAPRO's commitment to quality is apparent at every stage of the process, and shows with every detail and material. Engineers subject BCDs to laboratory tests as well as actual dive testing in harsh conditions, ensuring maximum ruggedness. This test diving occurs in varied environments all over the world, in scenarios from tropical to ice diving. Rest assured that a SCUBAPRO BCD will deliver outstanding performance on the day you buy it, and continue to do so deep into your diving future.

DIVER-TRUSTED.

SCUBAPRO BCDs not only surpass all industry testing and certifications; they are also consistently top-rated for comfort, fit, stability at depth and quality valve systems, while providing superior buoyancy and ascent control. Divers know their SCUBAPRO BCDs can be counted on to provide years of trouble-free service.

THERE'S A SCUBAPRO BCD TO MEET EVERY DIVING CHALLENGE.

From lightweight travel BCDs to heavy-duty stabilising jackets, SCUBAPRO has a BCD to meet any diving scenario, from casual recreational and travel diving to cold-water, deep-water and technical diving.

STABILISING

Master

HYDROS ADJUSTABLE FIRST IN ITS CLASS.

HYDROS X new

The HYDROS X is the world's first front-adjustable BCD to offer a fully injection-moulded Monprene® thermoplastic harness. This unique feature allows you to tailor the harness shape to fit your torso perfectly, creating superior comfort. Add the full-sized backpack and stainless steel Super Cinch tank band and you also get excellent stability at depth and on the surface.

The air cell and harness are modular and detachable. The bladder, made out of EndurTex high-tenacity nylon fabric, is extremely lightweight and durable while offering generous lift capacity. A modern design, made with modern materials, with the HYDROS X you can explore the depths in comfort, style and with total confidence.

ULTIMATE FIT & COMFORT

Monprene® harness moulds to your specific body shape, and rotating quick-release shoulder buckles allow you to route your shoulder straps to optimise fit.

ULTRA DURABLE

Monprene® harness is extremely resistant to UV, chemicals and abrasion, and the new EndurTex high-tenacity 420 nylon fabric bladder can handle years of dive use.

SUPER CINCH TANK BUCKLE SYSTEM

Locks the tank in solid for maximum stability at depth.

PLENTY OF STORAGE

Two big zippered cargo pockets are easily accessible, even when the weight pouches are fully loaded. Two stainless steel D-rings provide additional clip-on points for carrying extra gear.

INTEGRATED WEIGHT SYSTEM

Flat-buckle quick-release weight pouches ditch quickly and easily.

EASY TO REPAIR

In the event of damage, every component on the HYDROS X is detachable and easily replaceable.

EASY TO ACCESSORISE

The HYDROS X features a Multi-Mount Accessory Matrix with multiple D-Rings and mounting points that easily attach various dive accessories.

HYDROS BACK FLOTATION

NOTHING COMES CLOSE.

HYDROS PRO

A true breakthrough in design, dive comfort and convenience, the HYDROS PRO is the most feature-rich, customisable and comfortable BCD ever created. Its 2-BCDs-in-1 design, interchangeable straps, packable design and included backpack with room for your entire dive kit, make the HYDROS PRO the perfect BCD for any destination and any dive.

WINNER OF THE RED DOT AWARD FOR PRODUCT DESIGN

Thoroughly modern and ultra-high-tech, the HYDROS PRO's ground-breaking design and manufacturing process create a BCD that molds comfortably to the body and provides unequalled load distribution, a super-streamlined profile and rock-solid stability at depth.

reddot design award
winner 2016

2-IN-1 BCD

The HYDROS PRO includes both Trav-Tek straps and a fully integrated weight system. So with a quick switch of clips, you can transform it from an integrated-weight BCD to a lightweight harness travel BCD. Now you only need one BCD for both local diving and travel.

PERFECT FIT

When you are wearing the HYDROS PRO you won't even know it's there. The HYDROS PRO molds to your specific body shape, and is designed with body grip gel, providing extreme comfort and stability.

TRAVEL FRIENDLY

The HYDROS PRO goes everywhere with you. Lightweight and compact, with a unique smart-pack design, the HYDROS PRO also comes with a customised backpack designed to fit your entire dive kit.

ULTRA-DURABLE

Monprene® construction means durability. The HYDROS PRO stands up to UV, chemicals, and abrasion without showing typical signs of wear. The modular construction makes repairs, even from remote locations, a snap. It's a BCD for life.

INSTANT DRY

No water absorption means neutral buoyancy and a lightweight BCD that is dry when it comes out of the water.

CUSTOMISE AND ACCESSORISE

Easily add, remove, or replace weight systems, bungees, D-rings, accessories and pockets to make the HYDROS PRO truly your own. With a wide range of mountable accessories and kits, your options are endless.

SPECIALISED FIT FOR WOMEN

Smaller air bladder. Shorter inflator hose. Curved shoulder straps that fit perfectly. Experience the difference of diving with a more thoughtfully designed BCD for women.

PERFECT FOR

- Instructors
- Tech Divers
- Travel Divers
- New Divers
- Dive Training

HYDROS PRO

The HYDROS PRO is built for anyone who loves to dive. A true breakthrough in dive comfort and convenience, the moldable Monprene®, adjustable fit and multi-attachment points combine to make this the most customizable and comfortable BCD ever.

Because it has near-zero inherent buoyancy, HYDROS PRO divers can shave ballast from their weight pouches, and because the material dries fast and packs into a compact bundle, HYDROS PRO divers can travel with ease.

Built to last, the HYDROS PRO is the ultimate back inflation BCD for all divers and all dive scenarios, from the warm waters of the tropics to temperate and cold waters the world over.

Hydros shown with Travel Tek Straps

MODULAR DESIGN

Virtually every component, including buckles, can be added, removed or replaced without stitching.

BODY-MOLDING

Back plate and harness system deliver maximum comfort and stability at depth.

MULTI-MOUNT ACCESSORY MATRIX

Multiple D-Rings and mounting points for a knife + light + SMB + hoses + crotch strap and much more.

SMART-PACK DESIGN

Shoulder and waist straps fold into the wing, creating a compact package for easy transport and storage.

COLOUR KITS

Colour Kits are available to match Seawing Novas [White, Black, Turquoise, Pink, Yellow, Orange, Blue, Purple, Army Green]. Kits sold separately.

ACCESSORIES (SOLD SEPARATELY)

- Bungee Loops for mounting SMBs, dive lights, octopus hoses, etc.
- Mini D-Ring Set for attaching clips, retractors, etc.
- Knife & Accessory Plate for mounting standard BCD knives.
- Add-on roll-up Ninja pocket & thigh cargo pocket.
- Counter weight pockets.

CHANGE YOUR HYDROS PRO WITH COLOUR KITS

BACK FLOTATION

SEAHAWK 2

AN UNFORGETTABLE EXPERIENCE.

The Seahawk 2 embodies the latest and greatest evolution of the popular Seahawk back-inflation BCD. This version features new design elements, cosmetics, and finishing details that are sure to please. Drift diving over spectacular underwater terrain while wearing a clutter-free, back-inflation BCD must be experienced in order to be appreciated.

HIGH-QUALITY AIR CELL

Offers a streamlined shape when deflated and substantial buoyant lift when inflated.

REDESIGNED SHOULDER ERGONOMICS

With rotating buckles improves fit, helps distribute the load and enhances stability.

REINFORCED SOFT BACKPACK

With inner padding adds to comfort, reduces overall weight, and makes it easy to fold and pack.

WEIGHT INTEGRATION

Quick-release pouches secure with low-profile buckles, backed by two rear trim pouches to create a comfortable swimming position.

SUPER CINCH STAINLESS STEEL TANK BAND

Positioned lower on the backpack and teamed with a second Velcro strap to optimise tank security.

STREAMLINED WAIST STRAP

Replaces the cummerbund for a perfect fit.

UPGRADED CARGO POCKETS

Redesigned and roomy, with zippered closures and knife grommets.

CLIP-ON OPTIONS

Six stainless steel 40mm D-rings, plus two 25mm D-rings.

LITEHAWK

The ultimate back-flotation travel BCD, the Litehawk is lightweight and delivers a comfortable, stable ride at depth. It has an ultra-slimmed-down design and its soft, flexible backpack lays flat and compact for packing.

COMPACT & LIGHTWEIGHT DESIGN

Soft backpack and low-profile rear air cell are perfect for dive travel.

CLUTTER-FREE ERGO HARNESS

Eliminates bulk and enhances freedom of movement.

EASY ADJUSTMENTS

Rotating quick-release buckles optimise the routing of the padded shoulder straps to maximise fit.

STABLE CONTROL

Tank band and strap system keeps tank secure and increases stability at depth.

ALUMINUM D-RINGS

Provide convenient clip-on points for additional gear.

FRONT ADJUSTABLE

SIMPLY AWESOME.

X-BLACK

Built rugged, supremely stable, and delivering huge lift capacity, the X-Black can handle even the most aggressive diving. It's also one of the most comfortable BCDs you'll ever climb into. If you're looking for a front adjustable BCD that can take anything you throw at it, and do it with comfort and style, you're going to love the X-Black.

STURDY, RELIABLE AND LONG LASTING CONSTRUCTION

Made with a combination of durable 1000 denier and 420 denier nylon for long-term wear.

EXCLUSIVE AIRFLEX SYSTEM

Special bladder provides easy buoyancy control, loads of buoyant lift and an extremely stable ride.

AIRNET COMFORT

Lightweight water-draining backpack padding enhances comfort.

INTEGRATED WEIGHT SYSTEM

Quick-release weight pouches ditch quickly and easily and secure with buckles.

CARGO CARRYING CAPACITY

Two large zippered pockets plus a zippered cummerbund pouch and eight aluminum D-rings provide lots of storage and clip-on opportunities.

SUPER CINCH TANK BUCKLE SYSTEM

Locks the tank in solid for maximum stability at depth.

A COMFORTABLE RIDE.

BELLA & GLIDE

Don a Glide or a Bella and prepare yourself for an enjoyable ride into the depths. Designed for divers who like the comfort and security that comes with a front-adjustable BCD design with Y-Fit shoulders and a wraparound air bladder, these popular BCDs come in a choice of colours, lots of sizes, and are loaded with comfort and convenience features.

WRAPAROUND AIR BLADDER

Places lift primarily under the arms and around the waist for perfect balance at depth and a relaxing floating position on the surface.

STAINLESS STEEL TRIANGULAR RING SYSTEM

Manages the forces in the Y's center, balancing pressure over the body and keeping the harness under control, regardless of dive conditions or your position in the water.

SUPER STABLE

With its contoured hard pack and single-band Super Cinch tank band, the Glide also delivers a stable ride at depth.

420D NYLON CONSTRUCTION

Offers both light weight and long-lasting durability.

SECURE WEIGHT SYSTEM

Integrated quick-release weight system is first-rate in both compactness and security. Once clipped in ballast weights won't go anywhere until you're ready, and then it's an easy squeeze-and-pull for a quick ditch.

EXTRA GEAR CAPACITY

Two large zippered cargo pockets, knife grommets, and stainless steel D-rings for clipping on additional gear.

DESIGNED FOR WOMEN

The Bella is specifically designed, tailored and sized for female divers.

LEVEL new

The Level brings together all the performance and comfort features you need for any recreational diving scenario. It is lightweight, extremely rugged, and really delivers when it comes to comfort, making it an excellent choice for recreational divers everywhere.

COMFORT & CONFIDENCE

Wraparound bladder hugs your body without squeeze.

MAXIMUM STABILITY

Super Cinch tank buckle system locks the tank in solid and stable.

ULTRA DURABLE

EndurTex high-tenacity 420 nylon fabric bladder is lightweight yet extremely rugged.

INTEGRATED WEIGHT SYSTEM

Quick-release weight pouches each hold up to 5kg of ballast and ditch easily.

GENEROUS GEAR STORAGE

A pair of Octo pockets are perfect for storing a safe second and console hose. Two large pockets with Velcro closures provide lots of cargo-carrying capacity.

GO

Lightweight, easy to pack and extremely comfortable, the Go is a true travel BCD while offering all the performance and convenience features you'd expect from a full-featured front-adjustable BCD.

AIRNET PADDED BACKPACK

Is water-draining, easy to fold and enhances comfort during long dives.

INTEGRATED WEIGHT SYSTEM

Quick-release weight pouches ditch easily and secure with low-profile squeeze buckles.

STABILISING

MASTER JACKET

The stabilising jacket of choice among commercial and military divers, dive instructors, and advanced divers, the Master Jacket offers impressive lift capacity and provides a comfortable "face-up" body position on the surface.

DESIGNED FOR SAFETY

Certified as a Combined Buoyancy and Rescue Device [CBRD].

ULTRA-DURABLE

Constructed of a combination of polyester and soltane for strength.

UNIQUE BLADDER DESIGN

Features internal passageways that allow air to flow unrestricted and accumulate at the BCD's highest point to maximise buoyant lift and eliminate air trapping.

SUPER CINCH

Tank buckle system locks the tank in rock-solid for maximum stability at depth.

X-TEK

Transitioning from recreational diving to technical diving requires a new set of skills and a specialised set of equipment. SCUBAPRO's X-TEK line of tech gear will take you to the most mysterious caves, interesting shipwrecks and deepest depths, with total reliability. Climb into a turnkey system or build a custom system of your own. Either way, you'll be equipped to face any subsurface tech diving challenge.

SIDEMOUNT

This easy-to-wear addition is compatible with the current X-TEK line and features a soft Airnet backpack, bungees and hooks for tank support and streamlining, making sidemount diving more convenient and comfortable. Includes stainless steel grommets, D-rings, handles, and valves.

KEY FEATURES

- 100D Cordura outer shell
- Soltane inner bladder
- Ergonomic SCUBAPRO balanced inflator
- Specifically designed for sidemount harness
- Attached crotch strap

X-TEK PURE TEK

A donut wing BC for single or double tanks.

SINGLE TANK

- X-TEK donut wing [18kg lift capacity]
- PURE TEK harness with stainless steel backplate

DOUBLE TANK

- X-TEK donut wing [27kg lift capacity]
- PURE TEK harness with stainless steel backplate

X-TEK FORM TEK

Never before has a heavy, double-twin system been so comfortable to dive with. Available with optional quick-release weight pocket system.

- X-TEK horseshoe wing [27kg lift capacity] and FORM TEK harness with stainless steel backplate.

X-TEK PRO TEK

With this horseshoe system, you are perfectly equipped for every dive. Doublebladder wing for complete redundancy, stainless steel back plate, and extremely durable harness for the highest safety in every situation.

- Double bladder
- 27kg lift capacity for twin cylinders and PRO TEK harness.

X-TEK FORM TEK HARNESS

A three-piece harness system with anatomically optimised back padding and shoulder straps that can be adjusted in length and alignment for maximum comfort.

Comes with two stainless steel D-rings. The harness can be equipped with an optional quick release weight system. Available with or without backplate and crotch strap.

X-TEK HORSESHOE TWIN WING

A double-bladder horseshoe wing with a lift capacity of 27kg.

With or without bungee to minimise drag.

X-TEK PRO TEK HARNESS

Available with or without stainless steel backplate. With continuous webbing, padded shoulder straps, and two stainless steel D-rings on each side. Includes back plate storage pack to fix a buoy. Available with or without backplate and crotch strap.

X-TEK HORSESHOE WING

A single-bladder horseshoe wing with a lift capacity of 27kg for double tanks. With or without bungee.

X-TEK PURE TEK HARNESS

Made of secure, continuous webbing which weaves through the stainless steel backplate to provide a custom fit. Comes with stainless steel waist buckle, two shoulder D-rings, one left D-ring on the waist belt, and "tri-glide" fasteners. Crotch strap optional. Available with or without backplate.

X-TEK DONUT WING

Unprecedented buoyancy control regardless of diving position. Available with 13kg, 18kg, or 27kg lift capacity and for single and double tank load.

SIDEMOUNT REGULATOR KIT

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold water or technical diving.

SCUBAPRO IS THE EXPERT IN THERMAL PROTECTION.

SCUBAPRO dive suits set the standard for comfort, style and thermal protection. Every feature is expertly designed and engineered to keep you protected throughout your entire dive, be it in warm equatorial currents or the frigid waters of the Arctic. Whatever the ocean demands, SCUBAPRO dive suits deliver.

SCUBAPRO engineers believe that a dive suit line is a technical gear category that deserves continuous R&D. That's why SCUBAPRO dive suits undergo a continual evolution in materials, pattern know-how and features.

For example, a number of SCUBAPRO dive suits are built using the Pure Design Concept, which involves fewer panels and seams, allowing maximum stretch and freedom of movement. Various advanced thermal linings are also used, including Diamond Span, and variations like diagonal back zippers are used to simplify self-donning and reduce stress on the zipper mechanism. Each model is especially designed for optimal function, protection and comfort.

SCUBAPRO DIVE SUITS MEET AND EXCEED ALL INDUSTRY CERTIFICATIONS.

All SCUBAPRO wetsuits, semi-drys and drysuits 3mm and thicker must pass the PPE [Personal Protective Equipment] tests, which are required in Europe. Additional testing under these standards includes resistance to high and low temperature testing, sea water resistance testing, resistance to repeated pressurisation in water testing, immersed thermal resistance testing, tensile strength of thermal insulating material testing, tensile strength of seams testing, tensile strength of closures testing, resistance to permanent material deformation testing, and finally, actual dive testing.

Dive suits are also subjected to CE Thermal Performance Classifications rated for use in one of four water temperature categories as described below:

CLASS A

Water temperature between 7°C and 12°C.

CLASS B

Water temperature between 10°C and 18°C.

CLASS C

Water temperature between 16°C and 24°C.

CLASS D

Water temperature > 22°C.

TRILAMINATE DRYSUITS

EVERTECH DRY BREATHABLE

**Lightweight and breathable on deck,
Dry and comfortable at depth.**

Top quality throughout, this premium trilaminate suit will keep you, dry and comfortable in all water conditions. Designed for avid divers and loaded with features. Updated with neoprene neck collar to protect latex and keeps hood in place, new stitched valve pad, improved semi-rigid boots and two large cargo pockets.

OH-SO-COMFORTABLE

Breathable nylon/PU/nylon trilaminate design allows body perspiration evacuation, but keeps water out.

NEW ERGO BOOTS

They protect your feet from beach rocks and shells and keep you from slipping on wet boat decks, yet are soft and comfy.

QUALITY SI-TECH VALVES

Ensure efficient and trouble-free airflow control to maintain warmth and buoyancy.

CLIMB IN, ZIP UP, ALL BY YOURSELF

Front diagonal BDM metal dry zipper not only keeps water out, it makes self-donning easy.

HASSLE-FREE FIELD REPAIRS

With the Si-Tech ring system you can easily replace damaged latex wrist and neck seals, or switch them out for optional silicone seals.

CARRY MORE STUFF

Two large cargo pockets equipped with D-rings, blue bungee, high-security over-flaps and Velcro closures for accessories.

DRYSUIT BOOT

A sturdy boot that handles the most rugged shoreline terrain, and designed to fit comfortably over the sock of any drysuit.

All SCUBAPRO drysuits come with a hood, carry bag, low pressure hose, repair kit, and owner's manual.

DEFINITION DRY

A serious mid-range drysuit that's built to last, with plenty of design features for a comfortable streamlined fit. Updated with neoprene neck collar to protect latex and keeps hood in place, new stitched valve pad, improved semi-rigid boots and two large cargo pockets.

TESTED FUNGUS-RESISTANT

The fabric blend has been certified fungus and bacteria resistant by an independent laboratory specialising in textile testing, reducing odors and extending the life of the suit.

NEW ERGO BOOTS

They protect your feet from beach rocks and shells and keep you from slipping on wet boat decks, yet are soft and comfy.

QUALITY SI-TECH VALVES

Ensure efficient and trouble-free airflow control to maintain warmth and buoyancy.

CLIMB IN, ZIP UP, ALL BY YOURSELF

Front diagonal BDM metal dry zipper not only keeps water out, it makes self-donning easy.

CARRY MORE STUFF

Two large cargo pockets equipped with D-rings, blue bungee, high-security over-flaps and Velcro closures for accessories.

OBERON DRY GLOVE SYSTEM FOR SLÄGGÖ

Here's a convenient and reliable method for attaching virtually any model of dry glove to a Släggö Flex Ring. Developed and manufactured by Si Tech, the Oberon Dry Glove System consists of 13 components per arm, connects to large and medium Släggö Flex Rings, and fits most common dry glove models [not included].

The Släggö Flex Ring is a modular quick-change solution designed to make it easy to replace a broken or torn wrist seal on a drysuit.

EASY TO MOUNT & USE

For each arm the system includes an Oberon Ring [with Lock and Release Ring, Rubber Ring and O-Ring], a Glove Ring, 4 O-Rings, and red, green, blue and yellow Spanner Rings.

LOCK & RELEASE RING

Is made of rubber for maximum grip, plus it protects the O-ring from dust.

NEOPRENE DRYSUITS

EVERDRY 4.0 PRO

The Everdry 4.0 Pro is a heavy-duty version of the Everdry 4.0. Targeted to military divers, commercial divers, tech divers and anyone who needs an exposure suit that can stand up to super-rugged diving activities, this drysuit is built for comfort and warmth but most of all, it's built to last.

RUGGED EXTERIOR LINING

Heavy-duty abrasion-resistant lining in grey and a slick anti-abrasion lining in black.

REINFORCEMENT WHERE IT COUNTS

Shoulders, seat and knees offer extra reinforcement. The heavy-duty YKK drysuit zipper is covered by a neoprene overflap for added protection.

TWO UTILITY POCKETS

Equipped with D-rings, bungees and zippered closures provide secure storage for tools or extra gear.

FEATURES THAT MAKE THE JOB EASIER

- I-Safe straps on both arms offer secure mounting spots for wrist instruments.
- Blue suspender system enhances fit and provides convenient lower suit support between dives.
- A hook is provided on the right-thigh utility pocket for attaching a hood.

EVERDRY 4.0

SCUBAPRO is known for our neoprene drysuits, and the Everdry 4.0 demonstrates why. This premium-plus compressed neoprene drysuit offers the streamlined fit, comfort and flexibility of a wetsuit with the thermal properties and watertightness of a drysuit. 4mm high-density neoprene weighs 50% less than traditional drysuit neoprene. It's also significantly softer.

BUILT TO LAST

Seams are triple-glued and double-thread blind-stitched on the outside; inside they are coated with liquid polymer to create a long-lasting waterproof seam.

WARM & COMFORTABLE

Orange plush interior lining is comfortable and enhances cold water protection. Smooth-skin fold-under neoprene neck seal and ultra-smooth wrist seals provide comfortable, watertight sealing surfaces.

SUPER-SOFT FOOTWEAR

Neoprene soft socks can be worn inside heavy-duty drysuit boots or standard neoprene dive boots. They also enable the suit to be turned completely inside-out for cleaning and drying.

QUALITY COMPONENTS

Si-Tech balanced side-activated inlet and adjustable outlet valves allow for pinpoint buoyancy control, increasing stability and control at depth.

EXODRY 4.0

Illustrating SCUBAPRO's commitment to innovation in all areas of dive equipment design, the premium-plus Exodry 4.0 fuses 4mm high-density neoprene with latex wrist and neck seals. This hybrid design is extremely effective, delivering minimal inherent buoyancy, maximum range of motion and an excellent sealing system. The Exodry 4.0 offers all of the construction, comfort and convenience features as the Everdry 4.0, with these additional features:

WARM COLLAR

Made of neoprene, it covers the latex neck seal to eliminate cold spots and increase comfort.

NEW ERGO DIVE BOOTS

They protect your feet from beach rocks and shells and keep you from slipping on wet boat decks, yet are soft and comfy.

All SCUBAPRO drysuits come with a hood, carry bag, low pressure hose, repair kit, and owner's manual.

K2 DRYSUIT UNDERGARMENTS

The undergarments of choice for drysuit diving, the new K2 line keeps you warm while you're diving dry. Sporting a modern, eye-catching design, these undergarments are available in three levels of thickness to suit a variety of thermal warmth requirements. Available for men and women.

K2 LIGHT TEMPERATE-WATER THERMAL PROTECTION

Pants and long-sleeve tops, made with a light grid plush material [164g/m²] that's breathable, warm and stretchy. Includes elastic wrist loops on the tops and heel straps on the pants.

K2 MEDIUM THERMAL PROTECTION FOR ALL WATER TEMPERATURES

When you need extra warmth, the Medium weight pants and long sleeve top, made with Heavy Duty plush material [339g/m²], K2 Medium is the right choice. Breathable, warm and stretchy.

K2 EXTREME COLD-WATER THERMAL PROTECTION

One-piece steamer design made of a breathable and stretchy dual fleece material [629 g/m²] for maximum thermal protection. Includes compression padding on shoulders, chest and knees, hip pockets with zippers, and elastic wrist loops and heel straps.

DRY GLOVES

EASYDRY PRO

These gloves are designed for use with drysuits, semi-dry suits and wetsuits. Manufactured from high quality vulcanised latex, which gives them a high elasticity and makes them very resistant to puncturing and tearing. The rough surface allows perfect grip.

EASYDON

High quality, vulcanised, elastic cuff, latex gloves for use with dry, semi-dry and wet suits. With separate interior knitted glove for additional warmth.

SEMI-DRYSUIT

The semi-dry concept is simple: Combine the fit of a wetsuit with some of the sealing elements of a drysuit. It's a smart solution for staying warm and relatively dry in cold or temperate water environments.

NOVASCOTIA 7.5

TEMPERATE-WATER THERMAL PROTECTION

Snug-fitting and flexible, the NovaScotia keeps you very warm and relatively dry while exploring the depths. With its easy-zip YKK Aquaseal Vislon dry zipper, improved plush lining, double zippered seals on ankles and wrists and long list of convenience features, the NovaScotia offers the ultimate fit, warmth and durability in cold-water and multi-dive thermal protection. Hood included.

WETSUITS

FITS LIKE A “SECOND SKIN”.

Unless you’re diving in water warmer than 37°C, as soon as you hit the water your body starts losing heat. Reducing or delaying this heat loss is the primary job of your wetsuit. To do that it must be built with the best materials, have quality seams, seals and zippers, and, most importantly, it must fit like a second skin. SCUBAPRO offers three families of steamers: our flagship Everflex, our dependable Definition, and our economical Sport. Offered in a variety of thicknesses with a variety of features, there’s a SCUBAPRO suit to meet the needs of every diver, every dive scenario, and every water temperature.

IT’S THE SCUBAPRO STORY.

Not only does our extensive collection of dive wear perform, it is also the most eco-friendly gear in the industry. SCUBAPRO continues to write the dive industry’s story when it comes to environmentalism and sustainability, especially with thermal protection.

From the introduction of X-Foam neoprene, to solvent-free glue used on all SCUBAPRO neoprene products [except boots] thicker than 1.5mm, these environmentally friendly innovations demonstrate SCUBAPRO’s desire to better protect divers, and reinforce our long-standing commitment to help protect our planet.

LEGENDARY SKIN PROTECTION

Because SCUBAPRO uses the very best neoprene on the market and industry-leading design and engineering, our 7mm neoprene dive suits are all CE certified Class A suits, the 5mm suits are all CE certified Class B suits, and our premium Everflex 3/2mm is CE certified a Class C suit.

These ratings are typically one class higher than some competitive suit brands, meaning a thinner SCUBAPRO suit can be used in situations where a thicker suit of another brand would be required to maintain comparable thermal comfort.

TPF
THERMAL PROTECTION FACTOR

[TPF] rating is an indicator of the thickness of a neoprene dive suit.

- **TPF-1** Up to 2.5mm - Best for water temperatures above 24°C
- **TPF-3** 3.0mm to 4.5mm - Best for water temperatures 21°C to 27°C
- **TPF-5** 5.0mm to 6.5mm - Best for water temperatures 16°C to 21°C
- **TPF-7** From 7.0mm - Best for water temperatures 7°C to 16°C

NOTE: TPF ratings should be used only as a guideline. Many factors affect a diver’s level of warmth beyond the thickness of the wetsuit and the water temperature. These include how long you’re in the water, how deep you dive, how many dives you’ve done in succession, how well your suit fits, whether or not you’re wearing a hood and gloves/booties, your particular body type, percent of body fat, and much more.

EVERFLEX

SCUBAPRO'S PREMIUM WETSUIT LINE.

SCUBAPRO's flagship wetsuit line has long stood at the forefront of dive thermal protection. Offering superb seam construction, an excellent seal system plus lots of little touches that make diving more comfortable and more fun, Everflex suits are high quality throughout.

100% EVERFLEX - 100% SUPER STRETCH

Everflex neoprene is thicker around the body's core for enhanced warmth, and thinner in the extremities for added flexibility and comfort.

DIAMOND SPAN

Diamond Span is warm, stretchy and quick drying and enhances cold water protection. Combined with a second lining donning and doffing was never easier.

PURE DESIGN CONCEPT

Uses fewer seams and panels, ensuring maximum range of motion.

TOPSIDE CONVENIENCE

Small neck zipper enhances topside comfort, eliminating the need to remove the suit between dives.

FEATURES THAT MAKE THE JOB EASIER

I-Safe straps; double seals zipper flap; spine pad; hood hook on right hip.

TPF-5

TPF-7

EVERFLEX 7/5

The Everflex 7/5mm delivers unbelievable thermal protection when diving cold water or repetitive diving in temperate water. It features double zippered seals with YKK brass sliders to minimize water intrusion.

EVERFLEX 5/4

The Everflex 5/4mm offers the same features, quality materials and construction as the Everflex 7/5mm, but with a thinner neoprene for even better stretch and freedom of movement.

EVERFLEX 3/2

Rarely, if ever, is a 3mm wetsuit capable of providing enough thermal protection to qualify as a Class C dive suit, but that's exactly what this suit has done. It's a testament to the superior materials, construction and design.

TPF-3

EVERFLEX HOODED VEST 2.5

Classic hooded vest made of 100% Everflex neoprene. Designed to layer with any SCUBAPRO steamer. Unisex.

DEFINITION

The 2020 Definition offers more comfort and more features. Special tailoring provides extra stretch where it's needed most to create a suit that fits the body like no other. Bigger abrasion-resistant shoulder, knee and elbow pads cover more area and increase long-term durability. Available in various thicknesses, this is thermal protection well-suited to any active cold-, temperate- or warm-water diver.

100% GREEN

Suits are assembled using a solvent-free glue.

YKK ZIPPER

Diagonal rear YKK zipper with brass slider offers increased long-term durability and ease of use.

DURABILITY

Glued & blind-stitched outer seams, single blind-stitched inner seams, and abrasion-resistant fabric on shoulders, seat, elbows and knees ensure a long life of active diving.

SEALS

Double zippered seals on ankles and wrists (single zippered seals on 3mm) feature YKK brass sliders for durability, water-tightness and ease of use. Wrist and ankle zippers on women's suits are extra-long for added convenience.

TOTAL COMFORT

Orange Infrared (IR) interior lining on the front and back torso of the 5mm suit reflects body heat for extra thermal insulation and is extremely soft against the skin.

TOPSIDE CONVENIENCE

Small neck zipper enhances topside comfort, eliminating the need to remove the suit between dives.

I-SAFE STRAPS

On both arms offer nonslip mounting spots for securing wrist instruments.

X-FOAM

Made of petroleum-free limestone neoprene.

DEFINITION 7.0 & 5.0

Delivering outstanding thermal protection, this suit features seamless single arm and leg stretch panels, with double zippered seals, to make donning and doffing even easier. Abrasion-resistant printed shoulders, elbow and knee pads cover more exposed areas and increase long-term durability.

DEFINITION 7.0 FRONT ZIP & HOOD

Filling the niche between traditional steamers and semi-dry suits, the Definition 7.0 hooded steamer is a thoroughly modern cold-water dive suit loaded with features. The high-stretch 7/6mm neoprene provides excellent thermal protection and increased range of motion. The attached hood warms head and neck, and the front shoulder-to-shoulder zipper makes it easy to get in and out of the suit without help from a dive buddy.

TPF-3

DEFINITION 3.0

This comfortable steamer takes all of the premium exterior design elements found on the Definition 5mm and includes special tailoring to create a suit that fits the body like no other. It provides the perfect level of warmth and comfort for warm-water diving.

TPF-1

DEFINITION SHORTY 2.5

Great for layering and tropical conditions.

DEFINITION VEST 6.0

Thermal protective jacket with attached hood.

TPF-S

SPORT

SOFT AND STRETCHY FOR EXTRA COMFORT

Sport suits are great for new divers, casual divers, and first-time suit buyers who enjoy diving in moderate to shallow depths. These suits are made of ultra-soft neoprene and feature a triathlon cut for enhanced range of motion in the shoulders and arms. The Sport line is an economical choice for divers seeking comfort, stretch and maximum freedom of movement.

TRIATHLON CUT

Uses wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement.

PURE DESIGN CONCEPT

Uses fewer seams and panels, ensuring maximum range of motion.

SEALS

Single zippered cuffs on ankles and wrists with YKK KA brass sliders offer durability and comfort plus are easy to use.

TPF-3

TPF-5

SPORT 5

This 5mm steamer is easy to don and doff, fits like a second skin and looks good in the process. The interior is lined with two plush materials that enhance comfort and warmth, dry quickly and provide cushion beneath wrist and ankle zippers.

SPORT 3

A super-comfortable dive suit designed for the tropics. The perfect choice when heading to the islands. This suit is built with flatlock stitching which is comfortable against bare skin, a vertical rear zipper and plush-lined single-cuff ankles and wrists.

This unique one-piece suit is perfect for warm-water snorkelling or other water sports.

HYBRID VEST 6.0

This versatile vest is designed to look great with all our suit families. Removable hood with durable zipper.

HYBRID CARGO SHORT

SCUBAPRO's updated Hybrid Cargo Short is built with a mix of quality 1mm X-Foam neoprene for warmth and durable nylon for stretch and comfort. They can be worn alone or underneath a wetsuit for added warmth.

PROFILE

PROFILE 0.5

This ultra-thin 0.5mm neoprene steamer can be used as a warm-water wetsuit or as a base layer beneath a thicker wetsuit for cold-water diving. Thumb and foot straps make it easy to put on the suit, plus they prevent ride-up. Included: A comfortable Silverskin inner lining.

All Scubapro suits are made from X-foam a petroleum-free limestone neoprene.

All SCUBAPRO neoprene dive suits are assembled using a solvent-free glue, a 100% green process. 1,5mm and thicker, except boots.

FOOTWEAR

When diving your entire body needs to be protected from the cold, and that includes your feet. SCUBAPRO draws on decades of experience in design, materials and construction, which is why SCUBAPRO boots and socks are the best.

NO ZIP 6.5

Velcro closure easy-in boots.

HEAVY DUTY 6.5

Form-fitting top.

DELTA 6.5

Newly designed cold water boot.

DELTA 5.0

Comfort and protection.

EVERFLEX ARCH 5.0

New arch design matches the foot's natural anatomy for the ultimate in comfort.

BASE 4.0

Economical foot protection.

GO SOCK 3.0

Designed to be worn with the GO travel fin. Also ideal for tropical beaches and training pools.

DELTA SHORT 3.0

Low-cut and lightweight.

HYBRID SOCK 2.5

Soft neoprene, textured sole and plush interior lining for warmth and comfort. Expanded sizing is great for smaller divers.

KAILUA

Breathable walker for beach and boat.

GLOVES

Nothing ruins a dive faster than cold hands or barnacle-cut fingers. SCUBAPRO's extensive line of super comfortable gloves delivers five-fingered warmth and protection for all water temperatures and all diving conditions.

G-FLEX 5.0
Super comfortable.

EVERFLEX 5.0
Optimal warmth and comfort.

D-FLEX 2.0
Ideal for tropical diving.

EVERFLEX 3.0
Excellent finger dexterity.

SEAMLESS 1.5
Tactile hand-warmer.

TROPIC 1.5
Backed with neoprene. Available colours to match a variety of other SCUBAPRO gear: Black, Aegean, Flamingo.

AEGEAN **FLAMINGO**

BLACK

HEADWEAR

Dive headwear protects your head from bumps and bruises, and it works with your exposure suit to minimise the loss of body heat.

Bibbed 6/5

5/3

3.0

SEALED HOOD 5.0
An ideal choice when wearing a Definition wetsuit. 5mm with slick face and neck seal.

NOVASCOTIA 5/4
Perfect combination with our Novascotia 7.5 Semi-Drysuit.

EVERFLEX HOODS

Constructed of high-stretch 100% Everflex neoprene for maximum comfort and durability. Extremely stretchy Silverskin lining feels good against the skin and provides a good seal to minimise water transfer.

UPF COLLECTION

ALL DAY PROTECTION WITHOUT SACRIFICING STYLE.

When it comes to protection from the elements, SCUBAPRO's UPF Collection has you covered. Built with the best technical materials available to ensure the highest quality, the UPF Collection protects you above the surface from harsh UV rays and below the surface from stings and abrasion. Choose from a variety of tops, steamers and leggings in men's and women's styling.

- Stands up to the elements – stands out anywhere.
- Designed to be worn by themselves or under a wetsuit.
- The perfect choice for before, during and after a dive.

ESSENTIALS

SCUBAPRO IS FAMOUS FOR ITS FINS.

SCUBAPRO is famous for its fins. The leader in fin technology for over 50 years, from the time-honored Jet Fin to the modern, award-winning Seawing Nova and our latest achievement, the Go/Go Sport. SCUBAPRO offers a selection of fins to suit every diver and every dive scenario, from time-honoured traditional to high-tech modern, blade fins and split fins, adjustable and full foot.

SEAWING NOVA

Setting the bar in dive fin design, the multiple-award-winning Seawing Nova combines classic SCUBAPRO fin technology with the latest innovations in hydrodynamic design to deliver incredible power, acceleration and maneuverability with total kicking comfort. You will be hard-pressed to find a fin that's more comfortable to wear, fun to kick, and looks so good when cruising the underwater world.

MONPRENE® ELASTOMER CONSTRUCTION

Virtually indestructible for long life.

WING BLADE

Creates a near-perfect balance of rigidity and flexibility.

VARIABLE BLADE GEOMETRY

Provides more power and class-leading stability with wing tips that arc upward.

ARTICULATED JOINT

Allows the entire blade to pivot and generate thrust, making the most of each kick.

ERG02 FOOTPOCKET WITH POWERPLATE

Reduces leg strain with comfortable design reinforced to the heel.

MARINE-GRADE BUNGEE STRAP

Self-adjusting, comfortable, and extremely durable. Makes easy work of donning and doffing.

SEAWING GORILLA

With a slightly stiffer blade the Gorilla allows for more effective sculling and reverse kicking. An excellent choice for tech divers and dive instructors.

reddot design award
winner 2011

SEAWING NOVA FULLFOOT

For divers who want the power, acceleration, maneuverability and effortless kicking characteristics of the open heel Seawing Nova, but with the foot support and comfort of a full foot design. A great fin for cruising the wrecks and reefs of the tropics.

GO FINS

GO TRAVELLING, GO DIVING, GO SNORKELLING – WITH GO FINS.

GO fins feature a compact design that increases convenience when travelling and comfort and ease of use in the water. Lightweight yet virtually indestructible, these fins are fast and nimble performers in the water, delivering speed, power, stability and manoeuvrability with a minimum of effort. Available in two models – “Barefoot Fit” and “Boot Fit” – GO fins are ideal for scuba divers and snorkellers who enjoy travelling.

100% MONPRENE® CONSTRUCTION

Ultra-strong material avoids problems of delamination, broken blades and torn foot pockets, making it ideal for long-term, heavy-duty use.

25-DEGREE PRE-ANGLED BLADE

Central Power Panel provides longitudinal rigidity and creates a channelling effect.

POWER BARS

On the underside of the rails preventing over-flex to maintain the optimum angle of attack under high load conditions.

TRAVEL FRIENDLY

The fins easily fit in IATA carry-on compliant luggage for divers who like to travel fast and light.

INNOVATIVE PIGGY BACK STACK SYSTEM

Interlocks one fin blade into the other, creating a snug pairing that makes packing and travelling so much easier.

GO SPORT

GO FIN
Barefoot Design

GO SPORT

For divers who want the kicking performance of the GO fin but prefer wearing boots, the GO SPORT offers a “Boot-Fit” design with a revised Ergo3 foot pocket that has been re-profiled to accommodate boots. The blade has also been revised to provide mounting points to attach skegs that minimise sideslip and maximise stability. This is a great fin for both travel and local diving.

PERSONALISATION WITH OPTIONAL SKEG COLOUR KITS

Skegs are offered in a variety of colours to personalise the fins or colour match to other dive gear.

SKEG COLOUR KITS

GO FIN

This travel fin features a “Barefoot-Fit” design that combines the fitment benefits of an open heel fin with the comfort and barefoot freedom of a full foot fin. The replaceable self-adjusting bungee heel strap allows for a versatile fit, is very comfortable on a bare foot, and makes the fin easy to don and doff – it can also be used with neoprene socks.

SOLD WITH A STANDARD BLACK STRAP. COLOURED STRAPS ARE SIZE SPECIFIC, OPTIONAL ACCESSORIES.

JET FIN

SCUBAPRO Jet Fins have a long and celebrated history of performance. They set the standard for power and durability in 1965 and continue to be immensely popular today.

TWIN JET MAX

This high performance fin features a slightly stiffer blade for split fin divers who like more feedback in their kicks.

TWIN JET

You won't find a better provider of maximum propulsion with minimum kicking effort than the Twin Jet. This fin is just fun.

JET SPORT FULL FOOT & ADJUSTABLE

The Jet Sport generates propulsive kicking power with excellent stability. It's easy to maneuver too, delivering the perfect blend of performance, comfort and price.

JET CLUB

The Jet Cub full foot fin comes with an ergonomic foot pocket that lets you enjoy remarkable foot comfort while benefiting from impressive kicking performance. The fin's big blade generates lots of power, while its vented design and three-material construction help maximise thrust and maneuverability and minimise leg strain.

FLUIDA

Timeless classic design full foot fin. Excellent thrust due to the streamlined shape.

DOLPHIN FIN

This versatile fin features an open heel design for petite snorkellers who like to wear neoprene booties. However, its foot pocket is so soft and supportive you can just as easily use the fin barefoot.

ESSENTIALS

MASK TECHNOLOGY AT ITS BEST.

With SCUBAPRO, you dive clear-eyed and comfortable. SCUBAPRO masks are available in a variety of styles with a choice of features to suit your diving style. Experience every adventure to the fullest by demanding extraordinary performance from your diving essentials.

Masks showing this ICON are compatible with the hands free Galileo HUD.

Similar to a ski goggle strap, the Comfort Strap attaches easily to a variety of mask models.

Our Ultra Clear Lenses do not have the greenish tint of normal glass, and offer exceptional clarity underwater.

D-MASK

ICONIC DESIGN, OUTSTANDING CLARITY, INCREDIBLE COMFORT.

Sharing the sleek styling of the D-Series D420 regulator, the D-Mask is a premium mask well-suited for all types of diving. This low-volume, wide-view mask is available in a choice of skirt sizes and features special lenses that filter out HEV and UV light for distortion-free viewing. It is also the only premium mask that features an interchangeable lens system for optional optical lenses. A Comfort Strap is included.

UNRIVALED LENS CLARITY

UV+420cut™ lens technology filters out HEV and UV light without affecting how colours appear under water.

PERFECT FIT

D-Mask comes with a choice of black or clear skirts in two sizes: medium or small as well as a special wide fit.

MAXIMUM COMFORT

Rotating buckles work with the black-on-black Comfort Strap to optimise range of motion for a comfortable, watertight fit.

HUD ADAPTER

Included for mounting a GALILEO HUD hands-free dive computer.

OPTICAL ENHANCEMENT

Interchangeable lens system makes it easy to install optional optical lenses (ranging from -1.5 to -5.0 or +1.5 to +4.0 in .5 diopter increments).

ADD- ON BI-FOCUS

Optional magnifiers can be bonded to standard lenses with a range of +1.0 to +3.0.

COLOUR KITS

Exchangeable colour kits to match different colour styles. Easy to click on without tools!

TRUFIT TECHNOLOGY

Silicone skirt near the mask frame is thicker and firmer with a matte finish for additional support and rigidity. The silicone contouring the face is thinner, providing a pliable, comfortable watertight seal.

SYNERGY TWIN TRUFIT

This dual lens mask offers a single skirt made of two thicknesses of silicone – thin and pliable where it touches the face, and thicker near the mask frame for support and rigidity. It's comfortable and provides a reliable seal against water intrusion.

new colour

SYNERGY MINI MASK

Downsized design, with a smaller frame and skirt to accommodate smaller faces. The special Trufit skirt is extremely comfortable and ensures a watertight seal, and the dual lens design is low volume and offers a wide field of view. The mask comes with a colour - coordinated Comfort Strap.

SYNERGY 2 TRUFIT

Single lens mask features a thin, soft inner skirt for fit and comfort, and a separate, thicker outer skirt to provide support near the mask frame. The most comfortable dive mask on the market, you only have to try on a Synergy 2 Trufit to feel the difference.

TWIN LENS

Twin (or dual) lens masks can be ultra-compact. Lenses are positioned close to the eyes, increasing peripheral vision while decreasing internal volume, making them easier to clear. These masks are also well-suited to prescription lenses.

ZOOM

The low volume Zoom is ideal for all divers, but especially for those who use optical lenses. This mask's innovative lens change system enables you to switch lenses yourself, without tools, in less than a minute. Sub-frames are available in colours to match Seawing Nova fins, HYDROS PRO BCDs and the new UPF Collection.

Available lenses: Bi-Focus +1.0 - +3.0;
Optical Lenses -1.5 - -8.0 and +1,5 - +4.0.

ZOOM COLOUR KITS

Exchangeable colour kits to match different colour styles. Available in 9 colour combinations. Easy to click on without tools!

SPECTRA

A metallic-look frame, dual lens mask.
Exclusive colour process gives your mask
the look of stylish eyewear.

SPECTRA MINI

The Spectra Mini offers the same features as
the twin lens Spectra mask, but is smaller in
size.

VIBE 2

Double lens mask with increased field of vision.
Includes EZ-Mask strap for central adjustment
and an additional standard mask strap.

ECCO

The perfect mask for snorkelling. A two lens
mask with low volume, liquid silicone and an
universal fit.

STEEL COMP

Ultra-low internal volume. Mask compresses on
descent so equalisation is not required as often.
Preferred by deep divers. Not recommended for
scuba diving.

SPECIAL MASKS

FUTURA 1

A SCUBAPRO classic!
The smallest volume mask out there.

PRO EAR 2000

Offering a sensational concept for ear protection
while diving, the Pro Ear mask comes with ear
cups to keep your ears dry while at the same time
allowing for easy equalising during descents.

SINGLE LENS

The single lens design eliminates the mask’s nose bridge, creating a broad, uninterrupted view of the underwater world. When looking slightly off-center, this enables you to maintain binocular vision, a real advantage for some divers.

FRAMELESS GORILLA

Same classic single lens design and comfort and performance features as the original Frameless, but with a larger, wider lens and a slightly larger skirt in a matte finish.

FRAMELESS

Diving's original frameless mask features a distinctive rectangular shape for excellent field of vision. The skirt's soft double-edge seal keeps water out and feels good against the skin. For the Galileo HUD a special model with an extra mounting bracket is available.

DEVIL

Offering excellent field of vision and a super-soft silicone skirt, the design of the nose pocket makes it easy to equalise. Includes both standard and EZ-Open mask straps.

GHOST

Low-volume frameless mask fits comfortably and offers a superb field of view. With easy-adjust buckles.

CRYSTAL VU

A single lens mask with seamless side windows for a panoramic field of vision.

SOLO

Enjoy the view in a streamlined, low-volume frameless mask. Double-sealed silicone skirt molds to the face for a comfortable, watertight seal.

TRINIDAD 3

The single lens mask styling offers an uninterrupted field of vision. Lens and skirt are assembled without a frame to reduce size and weight. A low volume design makes clearing water from the mask easy. Available in an exciting range of vivid colours that match SeaWing Nova fins and HYDROS PRO BCDs.

STEEL PRO

Frameless, single lens design offers an expansive, low volume view. Streamlined and lightweight, its soft silicone skirt provides a comfortable, watertight seal. Perfect for freediving or scuba diving.

ACCESSORIES

new colour

COMFORT MASK STRAP

Similar to a ski goggle strap, the Comfort Strap is comfortable, protects hair from being pulled, and attaches quickly and easily to a variety of mask models. Two small silicone strips have been added to the inside of the straps to eliminate slippage. Easy to attach and easy to use, one size fits all for total convenience. Available in lots of stylish colours.

BUCKLE SLEEVE

Slips easily over the quick-adjust buckles to protect your hair from snagging on the bare buckles.

VELCRO & NEOPRENE MASK STRAPS

GO PRO™ MASK MOUNT

GoPro™ mask mount fits virtually every double lens mask.

SNORKELS

SCUBAPRO snorkels are hydro-dynamically designed for exceptional breathing performance. They feature dry, splashguard or open barrel tops, purge valves for easy clearing, and specially-designed silicone mouthpieces for maximum comfort.

SPECTRA DRY

Large-bore tube allows plenty of airflow. Dry top closes when submerged so no clearing is needed upon resurfacing.

SPECTRA

This snorkel is top when it comes to breathing comfort and ease of clearing. The large bore upper tube is rigid for stability and allows plenty of airflow.

ESCAPE

Splashguard design helps keep water from entering the large-bore barrel while allowing abundant airflow. Includes an efficient purge valve and comfortable mouthpiece.

APNEA SNORKEL

Made from flexible, non-toxic silicone, the upper barrel on this versatile surface breather can be removed if you prefer to use a shorter pipe. The snorkel easily attaches to your mask strap, and can be folded and stowed in an accessory pocket. Now available in new colours.

FUSION DRY

Modern design features a splashguard top and a lower flex hose. The comfortable silicone mouthpiece is interchangeable.

SNORKEL SETS

ZOOM COMBO

The Zoom Combo teams the low volume dual lens Zoom mask with a Spectra snorkel. The Zoom features a lens-change system that enables divers to switch optical lenses, without tools, in less than a minute. It offers a universal fit and comes with a Comfort Strap and is packed in a carry bag.

SYNERGY TWIN COMBO

This premium mask/snorkel set includes the Synergy Twin Trufit mask and Spectra Dry snorkel. Its low volume, dual lens design offers a wide field of view. The combo comes with a Comfort Strap and is packed in a carry bag.

PANTAI COMBO

Performance mask and snorkel set with a low volume performance mask. Includes the valve snorkel Vent 2. Packaged in an handy net bag.

CURRENTS COMBO PRO

Clear silicone skirt with twin lens and vented flex snorkel with splash guard make this an universal set for diving and snorkelling.

ECCO COMBO

Clear silicone skirt with twin lens and vented flex snorkel with splash guard make this an universal set for diving and snorkelling.

YOUNG DIVERS

SCUBAPRO's line of young diver's equipment is the same high quality, durability and materials as our adult gear. Designed to address the unique fit and performance needs of young divers, SCUBAPRO ensures that their first underwater experiences are unforgettable. All products are guaranteed to be non-toxic and phalate-free!

REBEL VEST 5.0

For added warmth and protection.

REBEL 2.5 & 6.5

Back-zip steamer delivers warmth, flexibility and a comfy plush interior.

REBEL SHORTY 2.0

2mm shorty in a cool, modern design, stretch panels on the sides.

REBEL HOOD 5.0

Protects head and neck. Velcro® closures make it simple to put on and off.

REBEL D-FLEX 2.0

Delivering the perfect balance of warmth and protection this glove offers a lot of stretch for maximum comfort and finger dexterity.

MK2 EVO/R095

The perfect regulator for your young diver. The MK2 EVO/R095 is lightweight and breathes easy. With shorter hose and a smaller mouthpiece. Invest in a regulator that will grow with your young diver.

NO ZIP 6.5

Velcro closure easy-in boots.

HYBRID SOCKS 2.5

Children's boots with flexible sole and adjustable top.

KAILUA

Breathable walker for beach and boat.

RASHIE

Shorts and tops sold separately.

CHILD 2 MASK

MINI VU MASK

SPIDER SET

MINI DRY SNORKEL

FLUIDA

Timeless classic design full foot fin.

DOLPHIN

Open heel snorkelling fin, made to fit the bare foot perfectly but also suitable for neoprene boots.

LIGHTS

TAKE THE LEAP WITH SCUBAPRO DIVE LIGHTS.

Unveil the mysteries of night diving, or turn the most routine day dive into a memorable adventure, with a SCUBAPRO Nova light. Light-years ahead in design, Nova lights are equipped with high-intensity LEDs that far outpace the competition in brilliant illumination. They are machined from heavy-duty aluminum, making them both lightweight and built to last, and they offer multiple power modes and safety features that rank best in class.

NOVA 2100 SF

The powerful Nova 2100 SF (Spot Flood) multi-use dive light offers both a 65° wide beam and a 15° spot beam to match any diving situation. Five light modes, plus an emergency signal mode, provide extreme versatility. The light comes with a choice of handles (a pistol grip plus two Goodman handles), rechargeable battery, charger and spare parts, all packed in a zippered EVA carry case.

LONG-LASTING, RELIABLE POWER

Powerful 25w Li-Ion removable battery provides 55 minutes of burn time at full power and constant brightness. Depth tested to 100m.

ONE-BUTTON OPERATION

Power on and off, adjust brightness, and switch beam angle by pushing one button.

SAFETY AND RELIABILITY

Corrosion-proof metal light head improves heat dispersion and increases durability. The completely isolated battery compartment protects internal electronics from water intrusion.

OVER-PRESSURE VALVE

Releases battery off-gassing – an important safety feature.

NOVA 850

The Nova 850 delivers intense illumination, ideal for lighting up the dark spaces and bringing out the vibrant colours on night dives as well as day dives. It is machined from heavy-duty aluminum so is both lightweight and built to last. A 50% mode allows you to increase burn time if you don't need the full power. Available in rechargeable [850R] and non-rechargeable [850] versions.

NOVA 850 WIDE

The Nova 850 Wide delivers the same illumination and offers the same features as the Nova 850, but is equipped with a wider 80° beam. Available in rechargeable [850R-Wide] and non-rechargeable [850-Wide] versions.

NOVA 250

The new Nova 250 is a versatile dive light that can be stored in the smallest BCD pocket. It offers three modes: 100% power, 50% power and Flash, plus is equipped with an over-pressure valve to release battery off-gassing, making it the safest small light on the market.

NOVA 200

Compact, lightweight aluminum LED light with rated output of 200 lumens. Up to 3.5 hours of high intensity light with 3 AAA alkaline batteries.

BAGS

TRANSPORT YOUR EQUIPMENT WITH TOTAL CONFIDENCE.

SCUBAPRO dive bags are engineered for strength and durability, providing just what you need to get you and your gear where you want to go.

DIVE'N ROLL

This 2-in-1 wheeled bag concept takes the hassle out of dive travel. The back portion of the main compartment is semi-rigid and provides outstanding protection. Remove the soft top bag for carry-on convenience, then zip them together and you're ready to roll again.

Dimensions: 66x40x32cm.

Weight: 3.98kg.

Volume: 84L.

CARAVAN BAG

Easy to move from the car to the boat or roll through an airport, the Caravan is the ideal large dive gear storage and travel bag. Features include a corrosion-resistant zipper, reinforced saltwater-resistant wheels, exterior side pockets and telescopic handle.

Dimensions: 70x40x35cm.

Weight: 4.65kg.

Volume: 105L.

DRY 120

Built with a blend of 500D nylon [85%] and polyester [15%] backed by a TPU coating. Reinforced base and saltwater-resistant wheels.

Dimensions: 85x40x35cm.

Weight: 2.60kg.

Volume: 119L.

XP PACK DUO

Lightweight yet durable, this rolling dive bag is an ideal gear carrier for world travelers. It now offers two main compartments instead of just one, with new internal mesh pockets for organising smaller items. Size complies with new IATA rules.

Dimensions: 80x42x35cm.

Weight: 5.10kg.

Volume: 118L.

PORTER BAG

Although a bit smaller than its predecessor, you still get lots of volume for transporting gear. Reinforced "off-road" skate-style roller wheels plus a backpack system let you easily roll or shoulder the bag wherever you want to go.

Dimensions: 80x45x35cm.

Weight: 2.50kg.

Volume: 125L.

CABIN BAG

This Cabin Bag sports four wheels, making it more luggage-like, more versatile, more user-friendly and the ideal roller carry-on bag for travelling.

Dimensions: 59x36x22cm.

Weight: 3.25kg.

Volume: 41L.

DRY 45

Seals contents from the elements with a reliable roll-and-close top opening.

Dimensions: 30x13x8cm.

Weight: 0.65kg.

Volume: 44L.

REPORTER BAG

A full 15% smaller than its predecessor, you get more inside padding and three roomy compartments.

Dimensions: 35x23x45cm.

Weight: 0.90kg.

Volume: 36L.

DUFFLE BAG

This heavy-duty traditional duffle-style bag is built tough. While weighing only two pounds empty, it provides enough volume to accommodate a full set of dive gear. It is also easy to load and unload thanks to its U-shaped double slider zipper.

Dimensions: 80x40x35cm.

Weight: 900g.

Volume: 112L.

MESH BAG BOAT

This popular duffle-style dive bag is made of durable coated nylon mesh that lets water drain easily. Roomy enough-and strong enough-for a full set of gear, it is still lightweight and folds easily for storage.

Dimensions: 70x40x30cm.

Weight: 450g.

Volume: 84L.

REGULATOR BAG

Rip-stop nylon.

Dimensions: 11,5x7x15cm

Weight: 200g.

Volume: 1.2L.

NOT SOLD SEPARATELY

COMPUTER BAG

Rip-stop nylon.

Dimensions: 35x26x10 cm.

Weight: 350g.

Volume: 9L.

BEACH BAG

Designed for a complete snorkel set with extra compartments for keys and wallet. Top handle and shoulder strap provide convenient carrying.

Dimensions: 67x27x17cm.

Weight: 350g.

Volume: 28L.

MESH SACK

Durable nylon mesh backpack is perfect for carrying snorkelling gear or tropical dive gear. Includes padded shoulder straps.

Dimensions: 66x39cm.

Weight: 500g.

Volume: 80L.

TRAVEL REG BAG VINTAGE

Heavy-duty PVC [Tarpaulin].

Dimensions: 32x32x10cm.

Weight: 800g.

Volume: 10L.

SNORKEL SET BAG

This carry bag is made of 600D Polyester with a PU coating and is suitable for one mask & snorkel set.

Dimensions: 43cm length, 8cm (top)

22cm (bottom) width, 10cm height.

Weight: 0,120kg.

KNIVES

Better to have a knife and not need it, than to need a knife and not have it. SCUBAPRO knives are indispensable tools for serious divers, offering quality blades with excellent cutting edges that are both durable and corrosion-resistant.

TK15

The first of the "Tactical" series of dive knives. 15cm single-piece stainless steel blade features both smooth and serrated edges along with a shackle key and a line cutter. The knife comes with a heavy-duty handle and fiberglass-reinforced polyamide sheath.

K6

15.5cm stainless steel blade offers smooth and serrated edges plus line-cutting notch. Includes injected molded sheath.

K5

A classic 11cm stainless steel blade.

MAKO

Compact dive knife offered in stainless steel or titanium with 8.5cm blade.

WHITE TIP

Excellent 6.4cm cutting edge. Stainless steel blade resists surface oxidation. Includes locking sheath and BC/hose attachment.

X-CUT

6.3cm titanium blade retains sharp serrated and smooth cutting edges for corrosion-free performance. Sheath fits tech harness waistbands.

SK75

Made of lightweight, corrosion-free titanium, this compact knife features a 7.5cm blade and an easy-grip handle with an eye to attach a security lanyard. It's the perfect cutting tool for attaching to a BC.

SK "T" TITANIUM

Titanium knife with patented sheath mechanism and exclusive design and 12.7cm blade.

SK21

A comfortable knife with a well formed grip with SoftTouch inlay and a 12cm blade.

The illustrations in this catalog may
not exactly represent the products
described and are intended as a guide
only. We reserve the right to alter
product descriptions or specifications as
necessary.

The printing paper of this catalogue is
EU-Ecolabel certified. A plastic coating
on the cover was deliberately avoided.
